

PRESCRIPTION SAVINGS PROGRAM FOR HOSPITALS

With prescription drug costs and formulary reductions on the rise, staying healthy can be expensive. By taking advantage of our innovative Prescription Savings Program, your patients can afford to get the prescriptions they need.

The program is complimentary and can provide your patients and their families with discounts on prescriptions not covered by insurance.

- Average savings of 44%, with potential savings of up to 75%*, on brand-name and generic prescriptions
- Accepted at more than 62,000 pharmacies nationwide
- No limits on use of the card and no enrollment fees
- Discounts for the whole family – even pets

PATIENT ADVANTAGES

- Absolutely no membership fees or enrollment
- All prescription drugs are eligible for the lowest discount price available at participating pharmacies
- Saves on prescription costs for the entire family
- Improved health outcomes
- Dedicated call center with live assistance to find a pharmacy and get information about medications
- **Embedding the Prescription Savings Card in patient discharge summaries gives them instant access to reduced prescription costs**

HOSPITAL ADVANTAGES

- Earn community goodwill by lowering the financial burden for patients without coverage
- Helps prevent medication adherence rates from plummeting improving overall health outcomes
- Supports positive impact on patient safety, satisfaction, and loyalty
- Helps reduce unnecessary hospital readmissions

THE PRESCRIPTION SAVINGS PROGRAM IS PERFECT FOR

- Patients with no prescription coverage
- Patients with prescriptions not covered by insurance
- Patients with a co-pay that is higher than the discounted price
- Savings on medications excluded from Medicare Part D
- Savings on prescription vitamins and OTC medications

PRESCRIPTION SAVINGS PROGRAM FOR HOSPITALS

HOW IT WORKS

It's simple. When a patient is discharged from the hospital, they receive a printed discharge summary. The Prescription Savings Program will now be embedded into each patient's discharge summary.

When a member of the hospital staff is walking the patient through their discharge instructions, they can point out the prescription discount card to the patient and share that it can help reduce the cost of their prescriptions.

The card is active and ready to use immediately. When the patient goes to fill their prescription, they need only to present the card to the pharmacist and any available discounts will be automatically applied at checkout. Here is an example of how the card will look within the discharge paperwork.

HOSPITAL LOGO

MEDICAL TRANSCRIPTION DISCHARGE SUMMARY

ADMITTING DIAGNOSIS: SYNCOPE.
CHIEF COMPLAINT: VERTIGO OR DIZZINESS.

HISTORY OF PRESENT ILLNESS:
This is an 800-year-old male with a past medical history of a few years ago, atrial fibrillation, peripheral artery disease, recently retired one year ago secondary to leg pain, 1 episode of vertigo while reaching for some books. He is unable to support self, but did not have any syncope. No real shortness of breath. Came to ER and had a CT head which showed no acute intracranial abnormalities. No focal deficits. No weakness, headache, vision changes or speech changes since one year. Peripheral neuropathy since one year ago. Medications. The patient also complains of weight loss and secondary to decreased appetite. No nausea, vomiting.

PROCEDURES PERFORMED:
The patient had a chest x-ray, which showed normal lungs, no pleural thickening and no pleural effusion. A CT scan of the head was performed. The CT scan showed no acute intracranial abnormalities. No old subdural hematoma.

CONSULTS OBTAINED:
A neurology consult was obtained.

PAST MEDICAL/SURGICAL HISTORY:
Positive for atrial fibrillation. The patient had AVR 6 years ago. Hypertension, peripheral neuropathy, atherosclerosis, hysterectomy.

FAMILY HISTORY:
Positive for atherosclerosis, hypertension, autoimmune disease.

SOCIAL HISTORY:
Never smoked. Alcohol socially. No drugs.

- Hypertension. The patient at home was on Cardizem ER 90 mg thrice daily, and it was changed initially to Cardizem 90 mg thrice daily, and then with Dr. Doe's request, we changed the Cardizem to 240 mg t.i.d.
- Atrial fibrillation with subtherapeutic INR. The patient at home was on Dabigatran. That was continued. Dr. Doe was of the opinion that the patient himself takes care of the Dabigatran, and Dr. Doe was of the opinion that probably that is why the patient is not able to maintain therapeutic INR. In the hospital, the patient's warfarin was increased to 5 mg q.d.s., and at the time of the discharge, he was requested to follow his appointments so that INR can be maintained.
- Gout. The patient was on allopurinol. There were no acute issues regarding the gout.
- Prophylaxis. The patient was on Protonix and TEDs.
- Social. The patient is FULLY CHIEF.

DISCHARGE DIAGNOSIS: Syncope.
DISCHARGE DISPOSITION: The patient is discharged to go home.
DISCHARGE MEDICATIONS: The patient was discharged on the following medications: Cardizem 240 mg p.o. thrice daily, dabigatran 150 mg p.o. once daily, allopurinol 100 mg two times daily, zolpidem 12.5 mg p.o. q.h.s., and Remeron 15 mg p.o. q.h.s.

For Medications Not Covered, Please Take The Card Back To Your Pharmacy. Present It To The Pharmacist And They Will Inform You Of The Cash Price. All Medications Are Eligible For A Discount.

Discounts are available exclusively through participating pharmacies. The range of the discounts will vary depending on the type of prescription and the pharmacy chosen. This program does not make payments directly to pharmacies. Members are required to pay for all prescription purchases. You may cancel your registration at any time or file a complaint by contacting Customer Care. This program is administered by Medical Security Card Company, LLC of Tucson, AZ. *Average savings of 44%, with potential savings of up to 75% based on 2014 national program savings data.

THE ACA CHALLENGE

Despite the implementation of the Affordable Care Act (ACA), more than 42 million people will still not have insurance coverage, according to a recent report from the Congressional Budget Office. This means that hundreds of thousands of prescriptions are written each week to patients who must pay out of pocket for their medications. And, among prescriptions that are filled, 15 to 20% are not covered by insurance.

DISCOUNT ONLY - NOT INSURANCE. Discounts are available exclusively through participating pharmacies. The range of the discounts will vary depending on the type of provider and services rendered. This program does not make payments directly to providers. Members are required to pay for all health care services. You may cancel your registration at any time or file a complaint by contacting Customer Care.
