

## WHAT IS DASH?

Clinical Excellence and Finance Initiatives dashboards that support Washington Hospitals. All Washington State Hospitals have access to DASH.

## What can DASH do for my hospital or health system?

### Quality Improvement

Compare your hospital's quality performance against Washington state and national benchmarks. Explore drivers for quality improvement.

### Medicaid Quality Incentive

Medicaid Quality Incentive (MQI) gives PPS hospitals the opportunity to earn a 1% incentive payment by meeting quality and financial requirements.

### Safe Deliveries Roadmap

A state-wide learning collaborative to improve key maternal and infant metrics across hospitals.

### Finance

Compare your hospital's financial performance against hospital, state, and national benchmarks.

### State Directed Payment Program

WA State Hospitals Quality Initiative Measures for the CMS State-Directed Payment Program. A federal program monitoring hospital's performances on key preventative and ambulatory care initiatives. The dashboards provide hospitals with the ability to view data related to initiatives using data reported by hospitals and PNWPop claims.

### Better Prescribing, Better Treatment

A joint effort between WSHA and WSMA utilizing the Prescription Monitoring Program database. Compare above guideline opioid prescribing against state and peer benchmarks to reduce opioid related harm.

### WA Rural Health Collaborative

Finance, quality, and demographics dashboards, for RHC member hospitals only.

## WHAT IS DASH PREMIUM?

**DASH Premium is the Washington State Hospital Association's strategy and market business intelligence tool that provides:**

- ▶ Advanced analytics tools to identify market trends, operations efficiency, and more for strategic and tactical decision-making
- ▶ Visualization of healthcare data including market share, operations, forecasting, and more using the Tableau platform
- ▶ Real, claims level inpatient and outpatient data that's updated monthly
- ▶ Data that is enhanced with a unique patient identifier so hospitals can see how patients consume care including readmissions, revisits, or how your patients interact with other hospitals

**Designed, built, and maintained by your hospital association** – guaranteeing that the tool will remain relevant to your needs as your needs change over time.
